

Acetyl Salicylic Acid Tablets

Each tablet contains
100 mg(Acetyl Salicylic Acid) Gastro Enteric
Coated.
Colour: Sunset Yellow FCF

DRUG CLASS AND MECHANISM:

Acetyl Salicylic Acid Tablets is a nonsteroidal anti-inflammatory drug (NSAID) effective in treating fever, pain, and inflammation in the body. As a group, NSAIDs are non-narcotic relievers of mild to moderate pain of many causes, including injury, menstrual cramps, arthritis, and other musculoskeletal conditions. Since the response to different NSAIDs varies from patient to patient, it is not unusual for a doctor to try different NSAIDs for any given condition.

PREPARATIONS:

chewable tablets: 81 mg; caplets and tablets: 325mg, 500mg; enteric coated (safety coated) caplets and tablets: 325mg, 500mg

PRESCRIBED FOR:

Acetyl Salicylic Acid Tablets is used for the treatment of inflammation and pain that results from many forms of arthritis, including rheumatoid arthritis, juvenile arthritis, systemic lupus erythematosus, ankylosing spondylitis, Reiter's syndrome, and osteoarthritis, as well as soft tissue injuries, such as tendinitis and bursitis. Acetyl Salicylic Acid Tablets is also used for rapid relief of mild to moderate pain and fever. Because Acetyl Salicylic Acid Tablets inhibits the action of blood clotting element (platelets), it is used to reduce the risk of recurrent stroke and near-stroke (transient ischemic attack). It is similarly used to prevent heart attack.

DOSING: Should be taken with food.

DRUG INTERACTIONS:

Acetyl Salicylic Acid Tablets should be avoided by patients with peptic ulcer disease or poor kidney function, since this medication can aggravate both conditions. Acetyl Salicylic Acid Tablets is avoided in patients taking blood thinning medications (anticoagulants) such as warfarin (Coumadin), because of an increased risk of bleeding. Some asthma patients can have worsening of breathing while taking Acetyl Salicylic Acid Tablets. Acetyl Salicylic Acid Tablets can alter the blood uric acid level and is avoided in patients with hyperuricemia and gout. Children and teenagers should avoid Acetyl Salicylic Acid Tablets for flu or chickenpox symptoms because of the associated risk of Reye's Syndrome, a serious disease of the liver and nervous system that can lead to coma. Acetyl Salicylic Acid Tablets is not habit forming. Acetyl Salicylic Acid Tablets can increase the effect of medicines used to treat diabetes mellitus, resulting in abnormally low blood sugars if not monitored. NSAIDs should be discontinued prior to elective surgery because of a mild tendency to interfere with blood clotting. Acetyl Salicylic Acid Tablets is best discontinued at least ten to fourteen days in advance of the procedure.

PREGNANCY:

Acetyl Salicylic Acid Tablets is generally avoided during pregnancy and in nursing mothers.

SIDE EFFECTS:

Most patients benefit from Acetyl Salicylic Acid Tablets and other NSAIDs with few side effects. However, serious side effects can occur and generally tend to be dose related. Therefore, it is advisable to use the lowest effective dose to minimize side effects. The most common side effects of Acetyl Salicylic Acid Tablets involve the gastrointestinal system and ringing in the ears. It can cause ulcerations, abdominal burning, pain, cramping, nausea, gastritis, and even serious gastrointestinal bleeding and liver toxicity. Sometimes, stomach ulceration and bleeding can occur without any abdominal pain. Black tarry stools, weakness, and dizziness upon standing may be the only signs of internal bleeding. Should ringing in the ears occur, the daily dose should be reduced. Rash, kidney impairment, vertigo, and lightheadedness can also occur.

WARNING:

Children and teenagers should not use aspirin, aspirin-containing or aspirin-related medications for flu symptoms or chickenpox without first consulting a doctor. A rare but serious illness known as Reye's syndrome may occur.

USES:

Aspirin is used to relieve mild to moderate pain, reduce fever, to reduce inflammation and swelling in conditions such as arthritis and is used in low doses as a "blood thinner" to prevent the formation of blood clots. It is effective in reducing the risk of stroke and offers a protective effect against heart attacks in men with chest pain.

Taj Pharmaceuticals Limited (the "Company") believes that the information included in the Investor Relations section of this website was correct at the time it was added to the website. However, the Company expressly disclaims any duty to update the information on the website and makes no representation or warranty as to accuracy and completeness of the contents of this Investors Relations section of the website or any other section of the website. Access to and use of the information on this website is at the user's own risk. The Company assumes no responsibility for any errors or omissions in the content of this website and disclaims any liability for damages of any kind (whether direct, consequential or punitive) arising out of the use of this website or the information contained on the website or on links to or from this website.

The Investor Relations section of this website contains forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934. All statements other than statements of historical facts, included on this website regarding the Company's strategy, expected future financial position, results of operations, cash flows, financing plans, discovery and development of products, strategic alliances, competitive position, plans and objectives of management are forward-looking statements. Words such as "anticipate," "believe," "estimate," "expect," "intend," "plan," "will" and other similar expressions help identify forward-looking statements, although not all forward-looking statements contain these identifying words. In particular, any statements regarding the Company's financial results and outlook, the continued implementation of the Company's strategic plan, the development of the Company's pipeline, the commencement of Phase 3 clinical trials for Puricase (pegloticase) are forward-looking statements. These forward-looking statements involve substantial risks and uncertainties and are based on current expectations, assumptions, estimates and projections about the Company's business and the biopharmaceutical and specialty pharmaceutical industries in which the Company operates. Such risks and uncertainties include, but are not limited to, the delay or failure in developing Puricase (pegloticase) and other product candidates; difficulties of expanding the Company's product portfolio through in-licensing or acquisition; not being able to manufacture commercial quantities of our products; not gaining market acceptance sufficient to justify development and commercialization costs if our products are approved for marketing; introduction of generic competition for API; fluctuations in buying patterns of wholesalers; potential future returns of API or other products; the Company continuing to incur substantial net losses for the foreseeable future; difficulties in obtaining financing; potential development of alternative technologies or more effective products by competitors; reliance on third-parties to manufacture, market and distribute many of the Company's products; risks of maintaining protection for the Company's intellectual property; risks of an adverse determination in any future intellectual property litigation; and risks associated with stringent government regulation of the biopharmaceutical and specialty pharmaceutical industries and other factors set forth more fully in certain reports filed with the Securities and Exchange Commission, to which investors are referred for further information. The Company may not actually achieve the plans, intentions or expectations disclosed in its forward-looking statements, and you should not place undue reliance on the Company's forward-looking statements. Actual results or events could differ materially from the plans, intentions and expectations disclosed in the forward-looking statements that the Company makes. The Company's forward-looking statements do not reflect the potential impact of any future acquisitions, mergers, dispositions, joint ventures or investments that the Company may make. The Company does not have a policy of updating or revising forward-looking statements and assumes no obligation to update any forward-looking statements.
