- ✓ Prevents atherosclerosis

Increases HDL & Decreases LDL & VLDL

Choose

- Dyslipidemia
- Diabetic Hypertension & IHD
- Nephropathy, Retinopathy & Neuropathy

Fenacor™ 160mg
fenofibrate tablets & 200mg

Fenacor can help treat the complete cholesterol picture. Fibrates help lower triglyceride levels by reducing the amount of VLDL (the triglyceride-carrying particle that circulates in the blood), which speeds up the removal of triglycerides.

Fenacor can be taken with or without food. The dosages are 160 mg and 200 mg once-a-day.

If you're concerned about your cholesterol and triglyceride levels and diet and exercise are not enough to manage your levels, ask your doctor if Fenacor may be right for you.
