

Thyrin Syrup

®

Thyrin Syrup

®

Compositions

Vasa (Adhatoda vasica).....	16 mg
Tulsi (Ocimum sanctum)	75 mg
Jambolan (Eugenia jambolana)	50 mg
Bow rasa (Archetto (musical)).....	50 mg
Halite (Natrium).....	75 mg
Sodium bicarbonate (Natron).....	85 mg
Magnesium stearate (Dryer).....	q.s.

Indications

Useful in all kinds of Thyroid diseases.

Description

The extract of jaman pulp from fruit of Eugenia jambolana showed hypoglycemic activity. This report is the first evidence of such activity in relation to pulp. The effect of pulp was seen in 30 min, while the seeds of the same fruit required 24 hr. The extracts of bark of Ficus bengalensis caused reduction in blood sugar level. These results were confirmed in streptozotocin-induced diabetic animals. The oral administration of the extract resulted in enhancement in serum insulin levels in normoglycemic and diabetic rats. The incubation of isolated islets of Langerhans from normal as well as from diabetic animals with each of these plant extracts stimulated insulin secretion. These extracts inhibited insulinase activity from liver and kidney.

Dosage

2 Spoons, 3 times a day or as directed by the physician.

Presentations

100 ml
