

## Topament

Each tablet contains:  
Topament - 25/50/100mg Tablets

Composition:  
Topament - 25 Tablets  
Each film-coated tablet contains Topiramate 25 mg

Topament - 50 Tablets  
Each film-coated tablet contains Topiramate 50 mg

Topament - 100 Tablets  
Each film-coated tablet contains Topiramate 100 mg

Indications :  
Topament is indicated as adjunctive therapy for the treatment of adults and paediatric patients aged 2-16 years with partial onset or primary generalized tonic-clonic seizures.

Dosage and Administration  
Adults (17 years and over):  
The recommended total daily dose of Topament as adjunctive therapy is 400 mg/day in two divided doses. It is recommended that therapy be initiated at 25-50 mg/day followed by titration to an effective dose in increments of 25-50 mg/week.

Paediatric Patients (Age 2-16 years)  
The recommended total daily dose as adjunctive therapy is approximately 5 to 9 mg/kg/day in 2 divided doses.

Titration should begin at 25 mg (or less, based on a range of 1 to 3 mg/kg/day) nightly for the first week. The dosage should then be increased at 1 or 2 weeks intervals by increments of 1 to 3 mg/kg/day (in 2 divided doses), to achieve optimal clinical response.

Contraindications :  
Topament is contraindicated in patients with a history of hypersensitivity to any component of this product.
