

Teracort 1ml ®

TERACORT- 1ml Vial
Each Injection Contains
Composition

Triamcinolone Acetonide I.P.40 mg/ml

Indications

Teracort is used to treat the itching, redness, dryness, crusting, scaling, inflammation, and discomfort of various skin conditions.

It is also used to relieve the discomfort of mouth sores.

Description

The antiinflammatory actions of corticosteroids are thought to involve lipocortins, phospholipase A2 inhibitory proteins which, through inhibition of arachidonic acid, control the biosynthesis of prostaglandins and leukotrienes. The immune system is suppressed by corticosteroids due to a decrease in the function of the lymphatic system, a reduction in immunoglobulin and complement concentrations, the precipitation of lymphocytopenia, and interference with antigen-antibody binding.

Contraindications

Hypersensitivity to triamcinolone acetonide or any of the other ingredients in this preparation contraindicates its use.

Dosage

As per the physician's advice.
