

Bludcor Powder

Bludcor Powder

Bludcor Powder

Each 400 gm. contains

Composition

Vasa (Adhatoda vasica).....	185 gm
Tulsi (Ocimum santum).....	40 gm
Haridra (Curcuma Longal).....	25 gm
Bow rasa (Archetto (musica).....	25 gm
Halite (Natrium).....	75 gm
Sodium bicarbonate (Natron).....	90 gm
Magnesium stearate (Dryer).....	q.s.

Indications

useful in all kinds of Blood diseases.

Description

The leaves of the vasa plant contain the alkaloid vasicine (C₁₁H₁₂N₂O), which is responsible for the small but persistent bronchodilatation, and an essential oil which is chiefly responsible for the expectorant action. The leaves and roots contain other alkaloids, vasicinone, vasicinolone and vasicol, which may contribute to the bronchodilatory effect through anticholinergic action on the vagal innervation of the bronchii. The bronchodilation effect is considerably increased after atropine administration. Studies have also shown vasa to be effective in the treatment of amlapitta (dyspepsia) and pyorrhea . The in vitro growth of several strains of Mycoplasma tuberculosis was inhibited by the essential oil at concentrations in the range of 2-20 ug/ml. . There has also been a report of thrombopoetic (platelet-increasing) activity with vasicine.

Sodium is a compound of many foodstuffs, for instance of common salt. It is necessary for humans to maintain the balance of the physical fluids system. Sodium is also required for nerve and muscle functioning. Too much sodium can damage our kidneys and increases the chances of high blood pressure.

The amount of sodium a person consumes each day varies from individual to individual and from culture to culture; some people get as little as 2 g/day, some as much as 20 grams. Sodium is essential, but controversially surrounds the amount required.

Dosage

1 spoons at all time, 3 times a day or as directed by the Physician.

Presentations

400 gm.
